

The actions in the curriculum at Harper Adams to address sustainability

- Teaching and Research
 - Three main ways in which it is delivered in the curriculum
 - Embedded within modules across all degrees– examples include Logistics and distribution and Supply Chain Management,
 - Specified modules designed- examples include introduction to ecology; waste and resource management,
 - Courses - Geography and environmental management
 - Research into a range of areas
 - Robotics
 - Alternative energies
- Practical experience
 - Placements-examples include: Two students who are working for two different poultry companies, Faccenda and Two sisters who are looking at energy consumption in poultry
