

# Embedding Sustainable Values in the curricula of Van Hall Larenstein

- Determine the required competences for graduates, including those for SD, together with professional practice.
  - For SD competences RESFIA-D© is a tool.
  - Translate the competences to indicators on 3 levels related to phases in the curriculum.
  - Establish learning sequences for the different subjects integrated in the competences.
  - Develop a matrix in which the curriculum elements are matched with the learning sequences, the competences and the assessment.
  - Use AISHE as a tool to evaluate the level of SD competence in curriculum, research and management of the curriculum and the University, from \* to \*\*\*\*\*
- 
- Policy frame work: to become the most sustainable UAP in The Netherlands in 2018
