Digitalization initiatives for study quality improvement in Latvia University of Life Sciences and Technologies (LBTU)

Dr. Irina Pilvere

**Rector, Professor, Full Member of
Latvian Academy of Sciences**

**Lille, France, ICA,
19-20 October, 2023**

A hybrid education strategy for the universities of the future

Natural sciences

Engineering and Technology

Medical and Health Sciences

Agricultural, forestry and
veterinary sciences

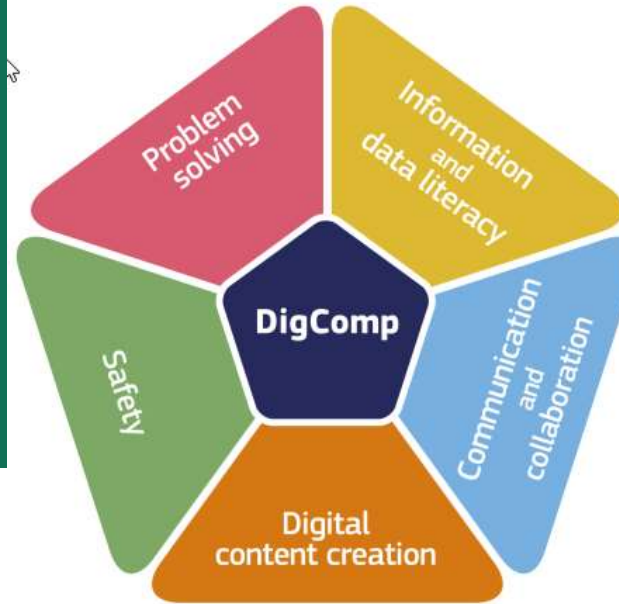

Social Sciences

Humanities and arts

I. IMPROVEMENT OF STUDENTS' DIGITAL COMPETENCE IN AREAS OF STRATEGIC SPECIALIZATION

II. INTEGRATION OF DIGITAL SOLUTIONS IN THE E-STUDY PROCESS

III. IMPLEMENTATION AND INTEGRATION OF THE DIGITAL SKILLS ASSESSMENT SYSTEM

- ◆ Flexibility
- ◆ Personalized learning
- ◆ Interactive engagement
- ◆ Availability

DigComp 2.2.
The Digital
Competence
Framework for Citizens
- With new examples of
knowledge, skills and
attitudes

I. Improvement of students' Digital Competence in areas of strategic specialization

- ◆ Development of study courses based on artificial intelligence (AI) and machine learning (ML) technologies.
- ◆ Choice of AI/ML solution directions depending on the class of application tasks.

Agricultural, forestry and veterinary sciences

Engineering and Technology

Social Sciences

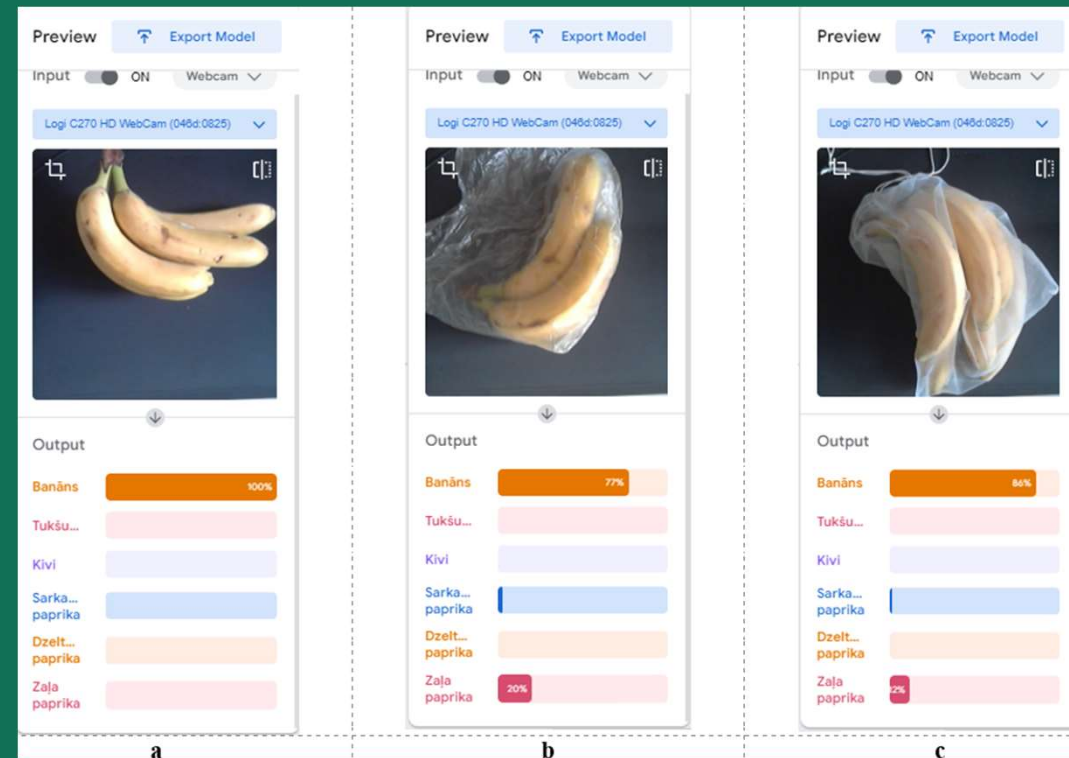

Development of study courses based on artificial intelligence (AI) and machine learning (ML) technologies

Horticulture (Bachelor of Vocational Education Program "Agriculture"): Identifying the phases of plant development using images obtained from a mobile device.

Business system analysis (academic master's study program "Economics"): product recognition, depending on the assortment and type of packaging

II. Integration of digital solutions in the e-study process

- ◆ Implementation of remote testing and knowledge assessment technologies.
- ◆ In the study process of integrating the electronic means of identification (e-card).
- ◆ Integration of the LBTU certificate (card) with the technical and software requirements of the European Student Card (ESC) implemented by the ESCI project.
- ◆ Creating a multifunctional hybrid audience for the study process, practical and researcho semināru nodrošināšanai.

LBTU / The European Student Card (ESC)

The new LBTU student card

- ◆ A card that allows identification of LBTU students and provides access to LBTU services.
- ◆ Joining the European student card initiative - a card that provides LBTU students with access to European university services during mobility.
- ◆ Cooperation with the municipality of Jelgava and within the framework of the Mastercard project Citypossible is exploring the possibility of integrating the e-card into national and city-wide services.

Activating ESC cards

4

Sākums / ESC / ESC

ESC

Aktivējot ESC karti, uz šo servisu tiks nosūtīti jūsu dati: **vārds, uzvārds, matrikula numurs, studiju beigu datums, LBTU epasta adrese**

Piekrītu aktivizēt "European Student Card" karti

Piekrītu aktivizēt "European Student Card" karti

ESC activation process in LBTU

- ◆ LBTU generates the necessary attributes (European student card number, European student identifier) in its IT systems, independently of the European student card system, within the framework of the European student card initiatives;
- ◆ Student ID cards become active as European student cards only after receiving the student's consent;
- ◆ It is expected that the student gives his consent or cancels it through the "My LBTU" section of the LBTU portal;
- ◆ A hyperlink to the LBTU homepage is encoded in the QR code, which will initially check on the LBTU side whether it is registered as a European student card and, depending on the result, will redirect to the homepage where it can be activated or will redirect to the European student card systems verification system.

The challenge of the ESC activation process

There is uncertainty at the moment from the maintainers of the European student card system regarding personal data protection issues- until these issues are sorted out, it would not be recommended allow students to apply for the European student card initiative.

As part of the project, LBTU has been registered on the ESC portal, so that ESC attributes can be integrated into the student certificates of both universities in the future.

A multifunctional hybrid learning auditorium was created at LBTU

Built in Hybrid Auditorium signal processing and switching equipment

Additional services for using hybrid auditorium

- ◆ Tutorials for working with hybrid auditoriums in different modes, on the e-studio website specially created for the project <https://digi.lbtu.lv>;
- ◆ A video server with the following main components has been created and is being developed: <https://opencast.lbtu.lv> stores video recordings divided by lectures/events, allows the instructor to perform simple editing - trim the beginning and end, other actions.
- ◆ Integrated with Moodle. Conference tool <https://plugnmeet.lbtu.lv> - an alternative to BigBlueButton, similar functions, but more modern.
- ◆ Allows higher quality recordings, change of camera quality, RTMP streaming to another server and available working integration with Moodle website digi.lbtu.lv Conference and video content "backend" <https://livekit.lbtu.lv>
- ◆ Video server API used for communication between project partners and Epiphan control / management from the Cue panel - <https://media-api.lbtu.lv>

III. Implementation and integration of the digital skills assessment system

- ◆ Initial assessment of student competencies.
- ◆ Assessment of post-course digital competences.
- ◆ Assessment of the growth of students' digital competences.
