LifeLong Learning

Drivers for Life Long Learning

Voluntary
Self-motivated
Desire to learn
Expand one's mindset

To this..

Life long learning

Why

- Skills needed to do current job
 - Need to change job
 - Want a new career
 - Prospects in a new field
 - Employer requires new training
-
- Technological developments, AI changing job descriptions and skills needed

How

- **Micro-credentials**
- MOOCs
- Nano-degrees
- Flexible learning pathways
- Industry offered training programmes

EU competitiveness: Looking ahead

To do so, we will establish a **Union of Skills** – focusing on investment, adult and **lifelong learning**, skill retention and the recognition of different types of training to enable people to work across our Union.

Central to this will be **embedding lifelong learning into education and careers** and supporting the training and the career prospects of teachers.

- Von Der Leyen

- Refocus its collective efforts on closing the innovation gap with the US and China, especially in advanced technologies.
- Joint plan for decarbonisation and competitiveness.
- Increasing security and reducing dependencies

- Mario Draghi report

It is also important to give vocational education and training (VET) the prominence it deserves. It prepares people for work and gives them the skills that companies are looking for. This is why I will propose a **European Strategy for Vocational Education and Training**, notably to boost the number of people with a secondary VET degree.

What are the strategic drivers for micro-credentials?

Figure 2. Examples of context in which micro-credentials are expected to play a role

SINCE 1997

NOW

Our collaboration is firmly based on expertise in innovative education, research, and knowledge exchange. We pride ourselves on being entrepreneurial, and on maintaining an innovative culture in our institutions, as well as providing a catalytic role for innovation in society.

Together, we will create, test and evaluate a whole new educational pedagogy. This will help to focus all the university activities from education, research, administration and support through to innovation and valorisation.

We are ECIU, the European Consortium of Innovative Universities, a network of 13 universities united since 1997 by a common profile of shared beliefs, interests, and mutual trust.

The ECIU University is an EU-funded European University that will create a completely new educational model on a European scale. The ECIU University gathers together learners, teachers, and researchers to cooperate with cities and businesses and solve real-life challenges.

Broad range of learning Offerings leading to Micro-Credentials

Current offers drawn mostly from existing study programs

- ECIU Challenges
 - Challenge-based learning
 - Learners team up
 - Typically practitioner collaboration with cities and companies
- Micro-modules
 - Mainly self-paced learning
 - Co-created by partners for ECIU
 - Micro 1-3 ECTS, standard up to 8ECTS
 - Online or hybrid setting
 - Instruction in English

Micro-credentials in ECIU University

A record of the learning outcomes that a learner has acquired following a small volume of learning which have been assessed against transparent and clearly defined criteria

- EU commission

Learning Experience

Digital Credential

ECIU chose EDC / Europass for Micro-Credentials as the current solution

ECIU required a solution that

- High level of authenticity: Self-sovereign and verifiable (non-forgable) MCs
- Aligns with EU's mandatory elements
- Includes rich metadata
- Can potentially be customized for stackability purposes
- Can be crafted and co-created with EU

Authentication and Verification Check

- ✓ **FORMAT**
This credential is technically valid.

European Standards

European Digital Credential

(based on European Learning Model ELM)

W3C VC datamodel

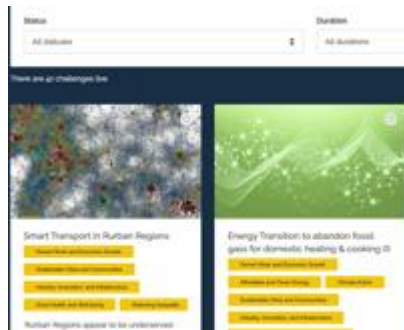

Qualified eSeal

Aligns with ESCO framework

Micro-Credentials from all ECIU learning opportunities

ECIU micro-modules

ECIU challenges

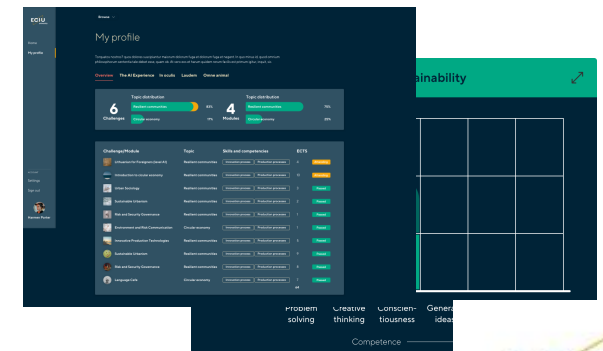

Issuing a verifiable digital credential (MC)
From Engage.eu –platform after
successful completion of learning

Learners store Micro-Credentials
in their Europass wallet (issued
from Engage with EDC)

Learners can monitor and steer
their learning from Engage-profile

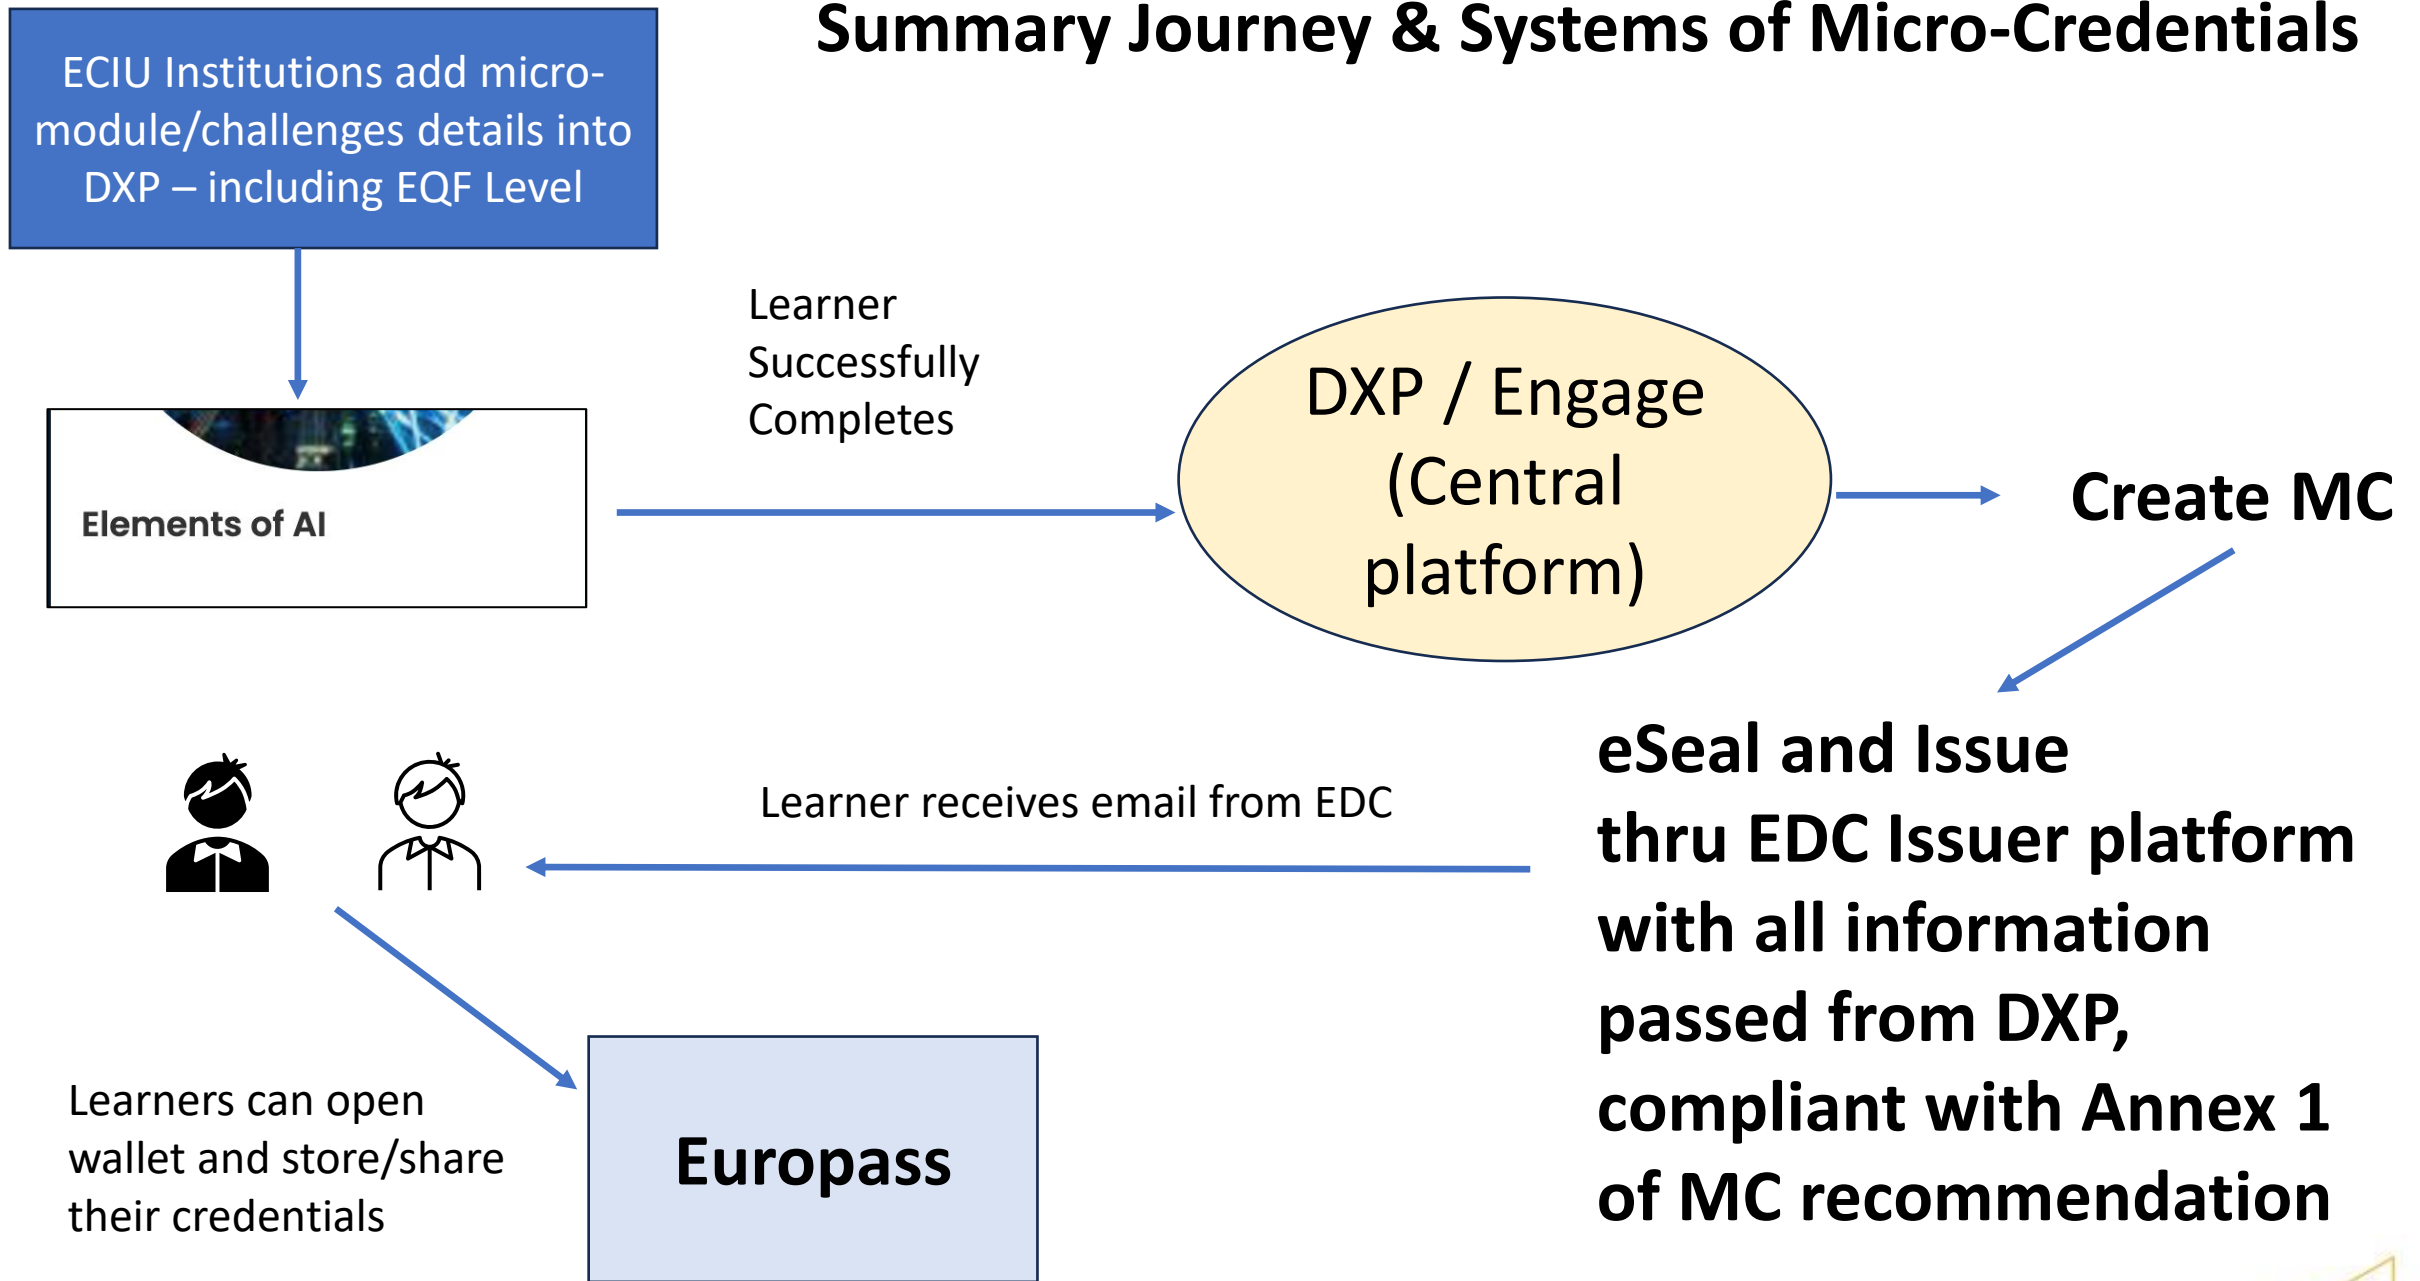

European standard elements to describe a micro-credential (Annex I)

-the information we capture in each MC

Mandatory elements:	Identification of the learner
	Title of the micro-credential
	Country(ies)/Region(s) of the issuer
	Awarding body(ies)
	Date of issuing
	Learning outcomes
	Notional workload needed to achieve the learning outcomes (in ECTS credits, where possible)
	Level (and cycle, if applicable) of the learning experience leading to the micro-credential (EQF, QF-EHEA), if applicable
	Type of assessment
	Form of participation in the learning activity
	Type of quality assurance used to underpin the micro-credential
Optional elements, where relevant (non-exhaustive list)	Prerequisites needed to enrol in the learning activity
	Supervision and identity verification during assessment (unsupervised with no identity verification, supervised with no identity verification, supervised online, or onsite with identity verification)
	Grade achieved
	Integration/stackability options (stand-alone, independent micro-credential/integrated, stackable towards another credential)
	Further information

Summary Journey & Systems of Micro-Credentials

FORMAT

This credential is technically valid.

SEAL

The credential is Sealed by Stichting European Consortium of Innovative Universities. This credential has not been tampered with since issue.

REVOCATION

Function under development. Contact the awarding body for information about this credential's revocation status.

ACCREDITATION

Accreditation does not apply to this Credential

VALIDITY

The credential is still valid.

VERIFIED

Learning Outcomes

Basic principles of data and software business

Student understands the basic principles of data and software business, and the special characteristics of software industry

Related ESCO Skills

[identify opportunities](#), [evaluate information](#), [business knowledge](#)

Show less ^

Monetizing with data and software

He/she can critically analyse how it is possible to monetize with data and software

Related ESCO Skills

[think creatively](#)

Show less ^

Collaboratively develop a data or software concept

He/she can analyze the feasibility of software business models. Student can apply theoretical knowledge and understanding of the data and software business characteristics to collaboratively create a solid lean canvas model for a software start-up.

Related ESCO Skills

[work in teams](#), [interact with others](#), [perform business analysis](#)

Show less ^

MCs can be accessed and compiled in Learner's (Engage.eu) profile

- Also referred to as Competence passport
- Stacking MCs based on the competence areas associated with the learning opportunity
- Learner's first do a Motivation scan to point out interest areas
- Monitoring progress and basis for Personalized recommendations / Flexible learning pathways
- *NOTE: Fixed bundles-type of stacking is currently not applied in ECIU University*

The screenshot shows the 'My profile' page on the Engage.eu platform. It features a sidebar with navigation options like Home, My profile, Account, Settings, Sign out, and a user profile for Harmen Porter. The main content area displays 'Topic distribution' for 'Challenges' (6 total) and 'Modules' (4 total). The 'Challenges' distribution shows 'Resilient communities' at 83% and 'Circular economy' at 17%. The 'Modules' distribution shows 'Resilient communities' at 75% and 'Circular economy' at 25%. Below this is a table listing various challenge/modules with their associated topics, skills, and ECTS credits.

Challenge/Module	Topic	Skills and competencies	ECTS	Status
Lithuanian for Foreigners (level A1)	Resilient communities	Innovation process Production processes	4	Attending
Introduction to circular economy	Resilient communities	Innovation process Production processes	10	Attending
Urban Sociology	Resilient communities	Innovation process Production processes	3	Passed
Sustainable Urbanism	Resilient communities	Innovation process Production processes	2	Passed
Risk and Security Governance	Resilient communities	Innovation process Production processes	1	Passed
Environment and Risk Communication	Circular economy	Innovation process Production processes	1	Passed
Innovative Production Technologies	Resilient communities	Innovation process Production processes	5	Passed
Sustainable Urbanism	Resilient communities	Innovation process Production processes	9	Passed
Risk and Security Governance	Resilient communities	Innovation process Production processes	8	Passed
Language Cafe	Circular economy	Innovation process Production processes	7	Passed
			64	

The diagram illustrates a competence matrix for 'Energy and sustainability'. The vertical axis represents 'Level' with categories: PIONEER, EXPERT, and EXPLORER. The horizontal axis represents 'Competence' with categories: Problem solving, Creative thinking, Conscientiousness, Generate ideas, Ability to learn, and Inn th. The matrix cells are shaded to indicate progress: '8' in the top-left cell (Pioneer/Problem solving), '2' in the middle-right cell (Expert/Generate ideas), and '7' in the bottom-middle cell (Explorer/Generate ideas). A grid of dots is visible in the background.

Challenges

Recognition of MCs

Employers awareness of MCs

Local regulation changes in individual countries

Availability of right MCs

Incentive for learners to pursue
